Simulation of UI Design Lifecycle using RAD Model with Axure RP

Name: Mohamed Aseel S
Roll No: 240701319

AIM:

To simulate the lifecycle stages of UI design using the **Rapid Application Development (RAD) model** and develop an interactive **Social Media Mobile Interface** using Axure RP.

Application Name:

ConnectHub – Social Media Mobile Application

PROJECT DESCRIPTION:

ConnectHub is a mobile-based social media application that allows users to sign in, view a feed of posts, explore content, and interact with posts through likes and navigation tabs. Users can browse posts, view details, and engage with content in a clean and modern interface.

RAD MODEL PHASES

1. Requirements Planning Phase

Identified Features:

- User Authentication (Sign In / Social Login)
- Feed Display (Grid & List View)
- Post Viewing Page
- Like functionality
- Bottom Navigation Tabs
- User Profile Indicator
- Timestamp display for posts

User Actions:

- User can log in using email or Facebook
- User can view posts in feed
- User can open a post
- User can like a post
- User can navigate between tabs

User Stories:

- As a user, I can log in to access my feed
- As a user, I can scroll through posts
- As a user, I can view post details
- As a user, I can like posts
- As a user, I can navigate using tabs

---

2. User Design Phase

Wireframes Created:

- **Login Screen** (Email, Password, Facebook login)
- **Feed Grid Screen** (Multiple posts layout)
- **Feed List Screen** (Scrollable posts)
- **Post Detail Screen** (Image, likes, description)

Interactions Added:

- Button click → Navigate to Feed
- Post click → Open detailed view
- Like icon → Increase like count
- Tab click → Switch screens

Masters Created:

- Header (App Title Bar)
- Bottom Navigation Bar
- Post Card Component
- Profile Icon Element

Annotations:

- UI elements clearly labeled
- Navigation flow defined
- User interactions documented

---

3. Construction Phase

Development:

- Designed wireframes converted into interactive prototype
- Navigation links between screens implemented
- Buttons and icons made functional

Testing:

- Tested using Axure preview
- Verified navigation between screens
- Checked UI responsiveness
- Ensured consistent layout

Iteration:

- Improved spacing and alignment
- Refined UI components
- Enhanced visual hierarchy

---

4. Cutover Phase

Finalization:

- Completed all UI screens
- Ensured smooth navigation and interaction

Export:

- Prototype exported as HTML
- Shared via Axure Cloud

User Training and Support:

- Explained app navigation
- Guided how to interact with posts
- Demonstrated login and feed usage
