Experiment 1

User Interface Design

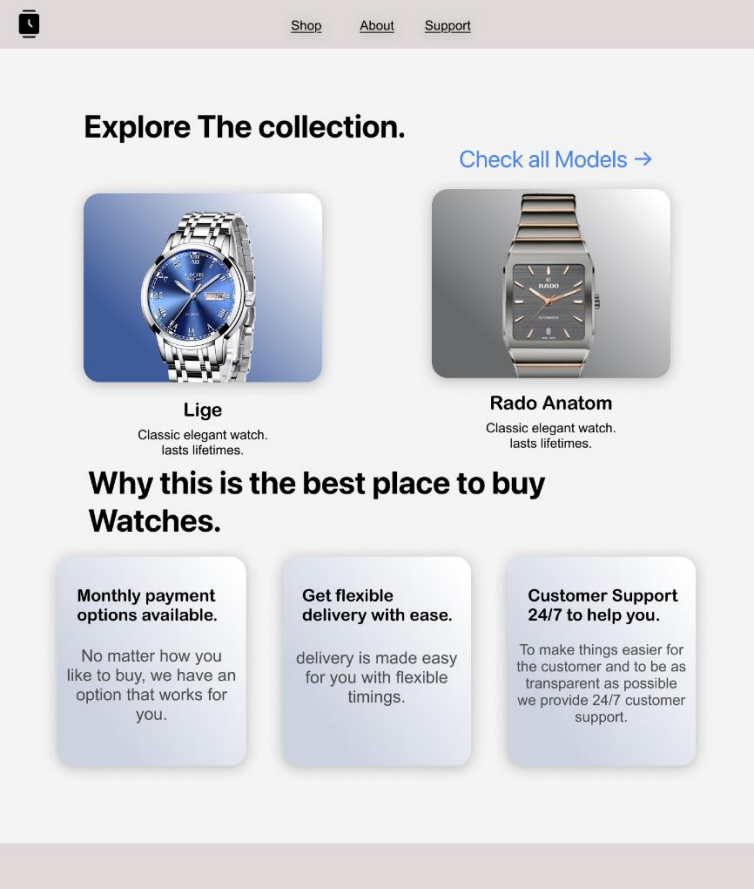
COMAPARSION OF UI DESIGN BETWEEN TWO FIGMA CREATION

Name: Mohamed Aseel S

Roll No: 240701319

Prototype link:
https://www.figma.com/design/tL94vl3GULZfF4jjNFdDxB/Exp1?m=auto&t=igyD6aAAGxBQZZR0-1

Bad Website:



1. Design Style:

- Uses a very **plain and minimal layout**.
- Light background with soft cards, but lacks strong visual impact.
- Product cards look generic and similar to many basic e-commerce templates.
- Overall appearance feels **simple but not premium**.

2. Content:

- Displays a few watch models with short descriptions.
- Text content is minimal and does not strongly highlight brand value or luxury.
- Focuses mainly on functionality rather than storytelling.

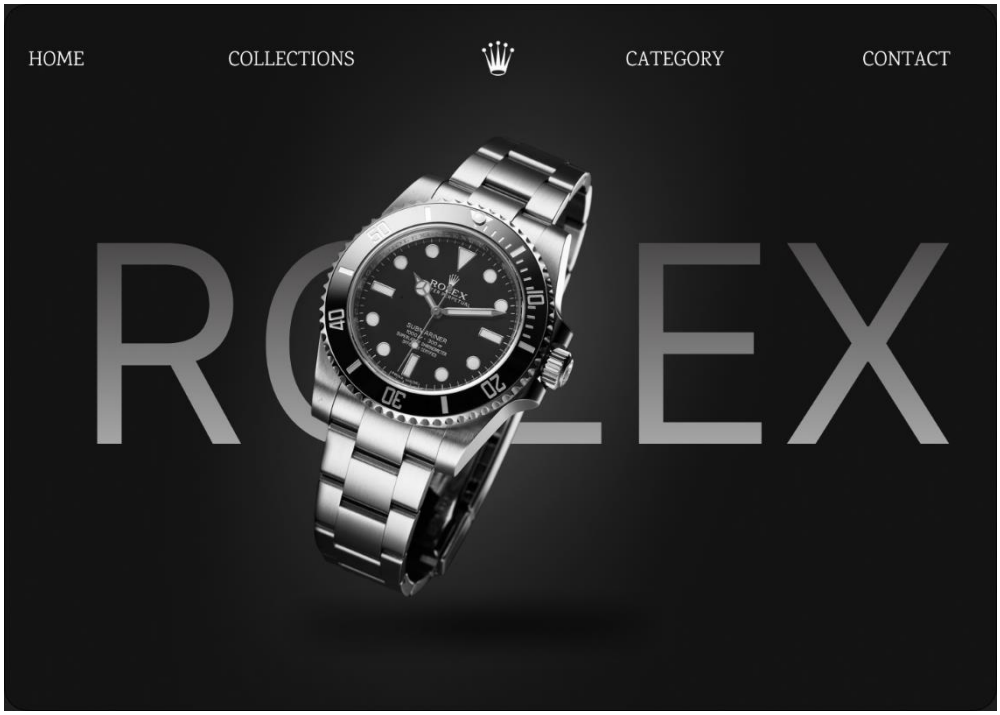
3. Navigation:

- Simple top navigation with limited options (Shop, About, Support).
- Navigation is clear but does not stand out visually.

4. Purpose:

- Mainly focused on **basic product listing and information**.
- Suitable for small-scale shopping but lacks a strong brand identity.

Good website:



GOOD WEBSITE (Rolex – Dark Luxury Theme)

1. Design Style:

- Uses a **dark, premium, and luxury-focused design**.
- High-quality product image placed at the center creates strong visual appeal.
- Large typography and contrast enhance elegance and brand dominance.
- Overall design feels **exclusive and high-end**.

2. Content:

- Minimal text, but very impactful.
- Focuses on brand presence rather than heavy descriptions.
- The product itself becomes the main attraction.

3. Navigation:

- Well-spaced navigation options (Home, Collections, Category, Contact).
- Clean layout with icons and branding that enhance user experience.
- Navigation blends well with the theme without distraction.

4. Purpose:

- Designed to **build brand identity and luxury perception**.
- Targets premium customers and emphasizes exclusivity over quantity.+

Key Differences:

- **Focus:** The first website is product-centric, while the second is brand-centric.
- **Design Aesthetics:** The first is simple and functional; the second is bold, premium, and visually striking.
- **User Experience:** The first provides basic usability, while the second delivers an immersive luxury experience.
- **Target Audience:** The first targets general customers; the second targets high-end luxury buyers.
